WHAT WE FOUND

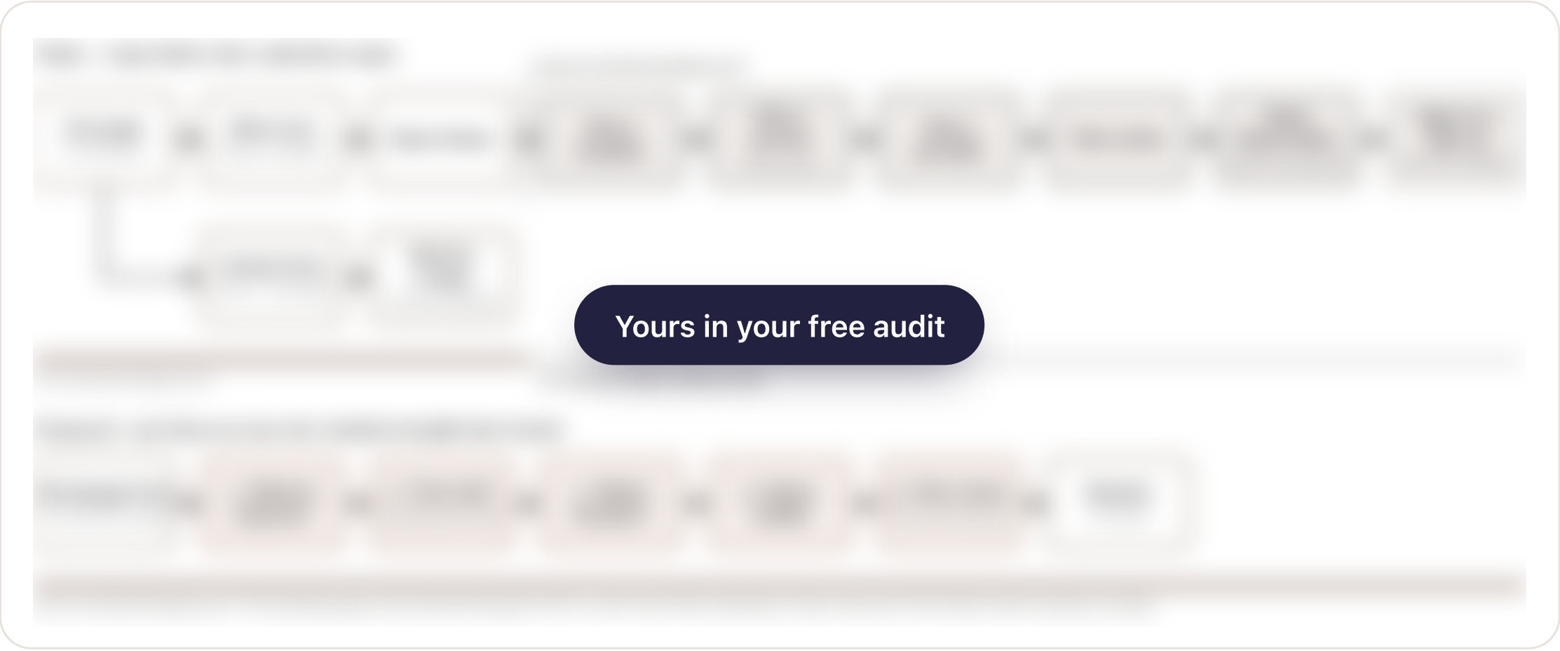
3 things are costing you bookings.

Booking leaves your site
Every Book Online button sends visitors to a separate Zenoti store.

Book is hidden on phones
The first phone screen has no Book button or phone number.

No form asks what she wants
The homepage form asks only for a name and email.

Today: 7 taps before she's asked her name. Ours: 5, and she's booked.



Top: the paths today. Bottom: one form on your site, easy questions first, time last.

THE FIX

What a new client sees instead.

Tap through it.

90-DAY BOOKING GUARANTEE · 90-DAY BOOKING GUARANTEE

Your booking rate goes up in 90 days, or we keep working free until it does.

- Booking form live in 14 days, or month one is free.

Booking rate = booking requests ÷ website visitors. We measure your baseline in week 1, before anything changes. For sites with at least 300 visitors a month.

EVERY MONTH AFTER

Month one builds it. Every month after makes it better.

1 **Find the biggest leak**
Your dashboard shows which step loses the most people that month.

→

2 **Test 2 fixes**
Half your visitors see the new version and half see the old one, so the result is real.

→

3 **Keep the winner**
Winners stay live, losers get switched off, and you see both on your dashboard.

Each winning test stacks on the last.

WHO WILL WORK ON YOUR BOOKING FLOW

I've already done this for the largest med spa chain in the U.S.

LaserAway

Before More Booked Consults, I spent six years as **Director of CRO at LaserAway**, owning the testing roadmap end to end.

These are the results I drove in that role, and the same playbook I'll use on Lumière Med Spa's booking flow.

Prepared by Gabriel Meierotto of More Booked Consults, former Director of CRO at LaserAway. Findings come from a public crawl of lumieremedspa.com (408 URLs checked, October 5, 2026) and a walk-through of the booking path on desktop and mobile. No forms were submitted. The value of each item is what it would cost to have it built separately.
